Course Description: The objective of this course is to introduce the basic principles used in financial management to the students. These principles are characterized in time value of money and relation between risk and return. Once the students acquire the basic knowledge on these principles, they will learn how to apply their knowledge to the valuation of bonds and stocks, financial planning, capital budgeting, leasing, long-term financing, capital structure, dividend policy and risk management. Upon completing this course, the students ought to be able to make basic decisions regarding which bonds or stocks to invest, which project to take, and if so, when; they should be able to extend their knowledge to how to finance a project, how much of payouts, in what form, to make, how much debt to carry, and how to hedge away potential risks associated with basic operations of a firm by using options and/or option-like securities, etc. Therefore, this course will be especially useful for students who are considering a career in corporate finance area. This course also lays foundation for more advanced investment and corporate finance topics to be taught in the higher level finance courses.

Pre-requisites: BUS 115, ECO 108

Textbook: The textbook for this course is Eugene F. Brigham, Joel F. Houston, *Essentials of Financial Management, newest edition*, Cengage learning. If you have *Fundamentals of Corporate Finance*, by Ross, Westerfield and Jordan, you can use that. (*Fundamentals of Corporate Finance* is the textbook of BUS 365 also). Lecture notes and other materials related to the class can be downloaded from the blackboard.
